OUR MISSION:

Our mission is to understand the needs of our customers and provide them with unique and innovative solutions to make their experience memorable.

OUR VISION:

To enhance Urban Gardening, promote green living spaces for a better and healthier life.

The Finishing Touch

DIRECTOR'S SPEAK

RAVI SINGH

When you think about the long, lazy summers of your childhood, chances are that you may remember the perfect garden at your grandparent's place. It is just not a garden, a lawn or a terrace, the fact remains that green is gradually disappearing from our lives, more so because it is difficult to imagine a garden in the urban landscape.

NEHA RAVI SINGH

When my clients first meet me, they often express their concern that they have a small apartment and how can we add a garden to it. I tell them they have the liberty to have their own green paradise literally anywhere. At The Finishing Touch, it is our aim to break the stereotypical myth that an urban set up cannot have a garden.

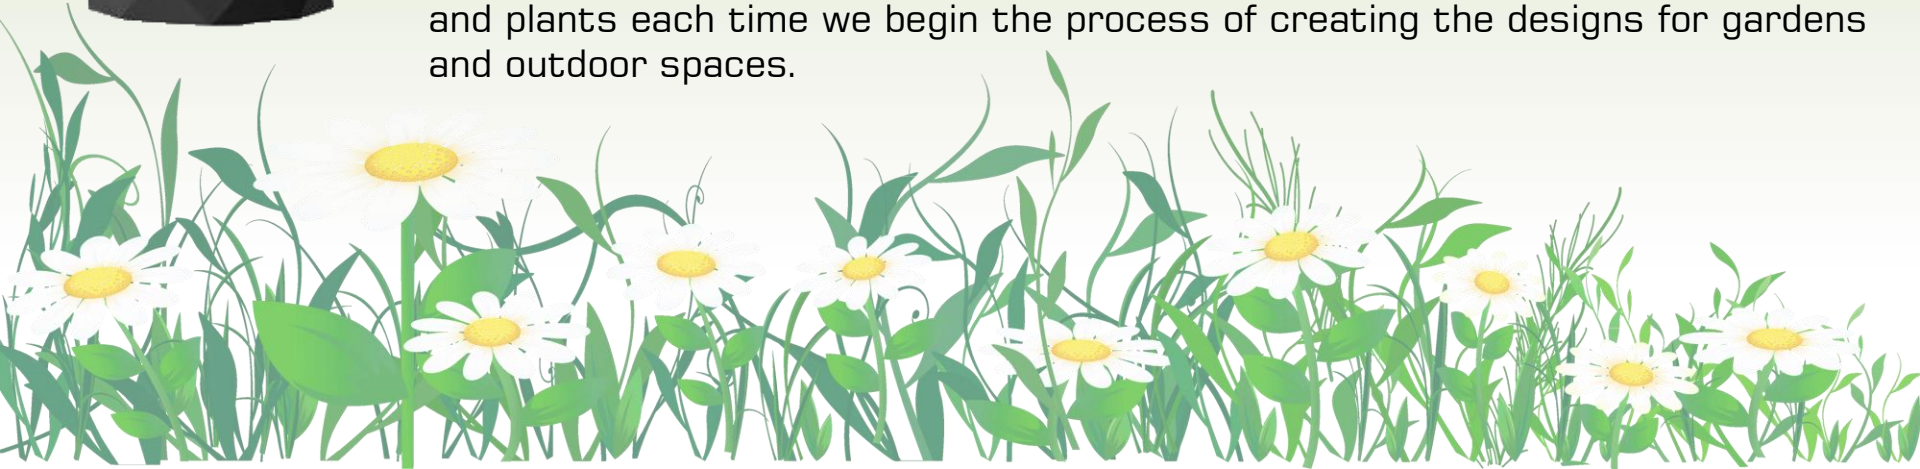

The Finishing Touch

Often when we think of gardens or landscape, the first picture that springs into our mind is of plants, trees, shrubs and flowers. However,

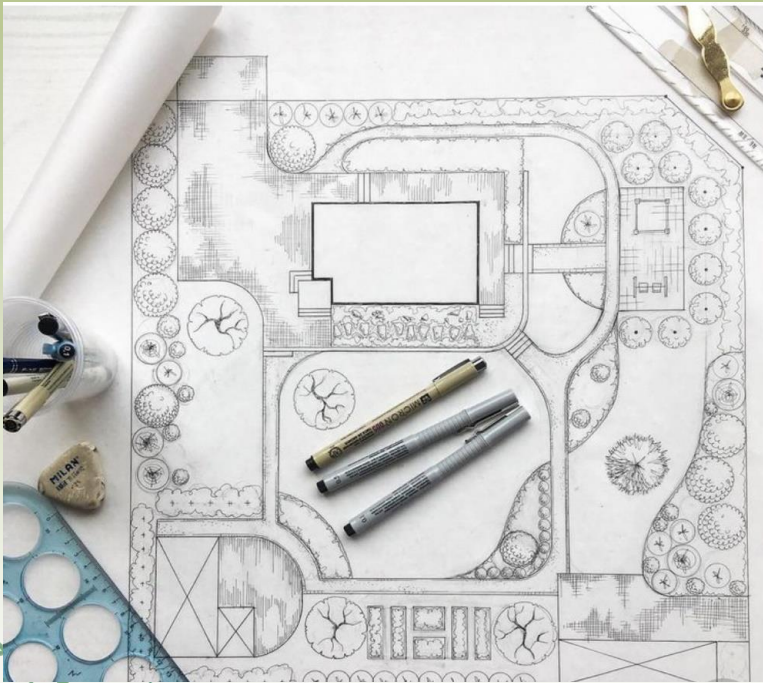

- ❖ To create a Dynamic garden, the planning has to compliment the hard landscaping materials and structures such as the path, pergolas, fences, gates and so on.
- ❖ There may also be a water feature, some decorative pots and planters or a simple piece of sculpture.
- ❖ Lighting is again used to enhance the garden at night by allowing individual features to be highlighted, providing sustained drama and emotional interaction and context within the space.
- ❖ It is the skilful combination of all these elements into a symbiosis that creates a successful Outdoor aesthetic.

We, as landscape designers seek out this harmonious balance of structure and plants each time we begin the process of creating the designs for gardens and outdoor spaces.

The Finishing Touch

At The Finishing Touch we believe that landscaping is a profession that includes designing, installing, and maintaining the outdoor human environment. Landscaping a garden is both an art and a science. Before one starts the process of landscaping, the planting areas need to be studied. Also the amount of sun, shade, moisture, wind, pollution and other conditions that can affect plants in every location needs to be understood. We design and implement landscaping jobs from scratch to totality. Planning spaces, detailed designing and execution are all endeavoured perfectly by us with fine workmanship.

The Finishing Touch

GREEN WALL

Green Walls are panels of plants, grown vertically on structures that can be either free-standing or attached to walls. Green Walls are also referred to as bio walls, vertical gardens, living walls or Eco walls.

As we run out of green space in cities, green walls can turn urban spaces back into something natural and beautiful. They can also improve air quality and provide health benefits.

The Finishing Touch

FEATURES OF A GREEN WALL

Spectacularly Beautiful

Green walls are not only beautiful, but also help in enlivening the ambience.

Absorbs Heated Gas

Green walls can absorb the harmful gases in the air.

Lowers Temperature

This feature lowers both Indoor and out door Temperature.

Healthier Air

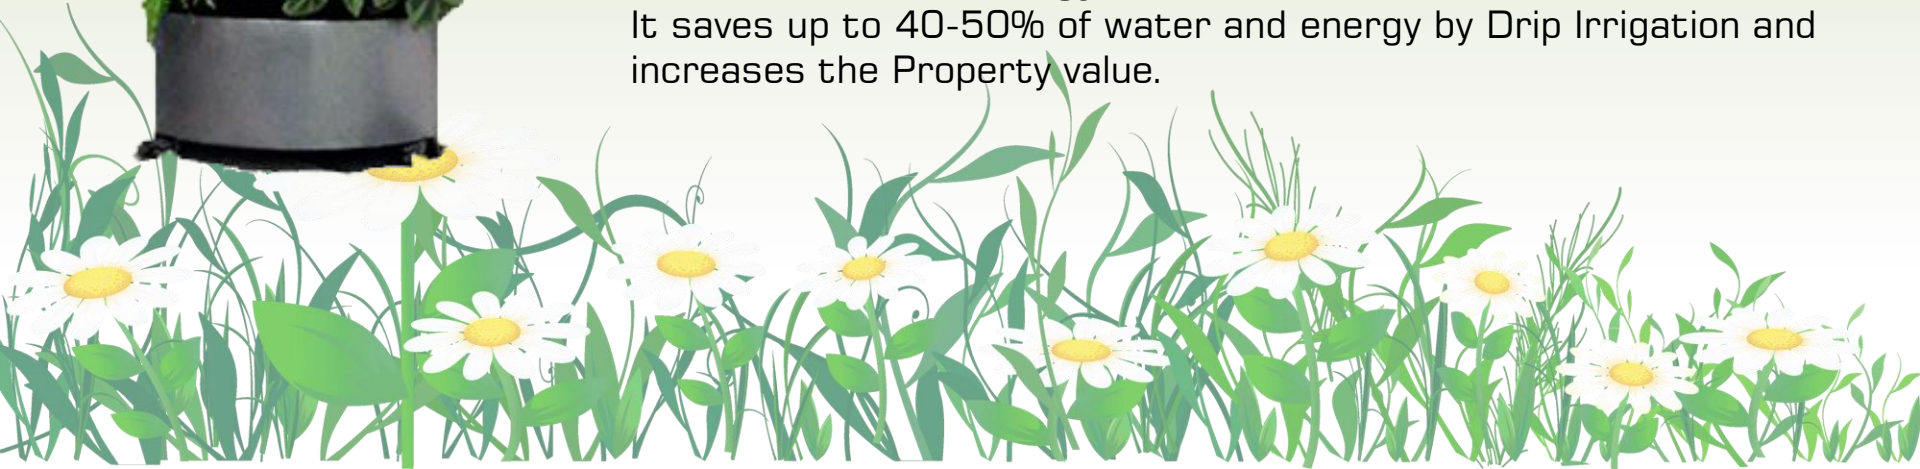

Green walls improve the quality of air.

Beautiful Space

Green walls make a place look beautiful.

Saves Water and Energy

It saves up to 40-50% of water and energy by Drip Irrigation and increases the Property value.

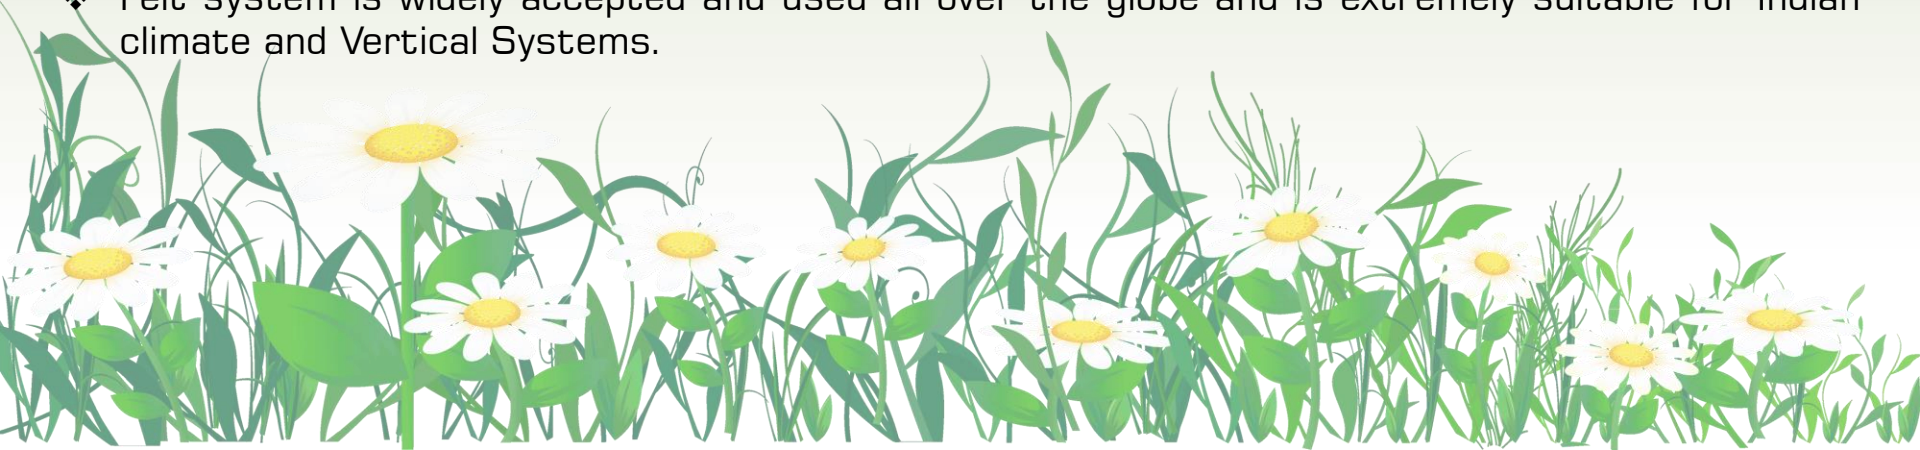

The Finishing Touch

VERTICAL GREEN WALL SYSTEM

- ❖ Plants are selected separately to fulfil the requirements of vertical wall.
- ❖ 40 varieties of indoor and outdoor plants are listed which are suitable.
- ❖ Vertical wall system consists of a frame and 3 pots which are mounted on the wall or a free standing galvanized structure.
- ❖ This wall can be installed indoors or outdoors and semi-shaded areas with a blend of different varieties of plants suitable according to the site layout and requirements.
- ❖ Installation also involves Drip irrigation, Automated timers(optional), and Drainage panels.
- ❖ Web also have provision for Vertical Standees for areas where the wall support is not available.

GREEN WALL TECHNICAL DETAILS

- ❖ We have developed a modular design for green wall which consist of Non woven Geotextile.
- ❖ It is excellent for the growth of the plants as this system allows the roots to freely grow.
- ❖ HDPE sheets are used for the support and water proofing of the system
- ❖ This system is easy to install and maintain due to its simple and innovative design.
- ❖ Felt system is widely accepted and used all over the globe and is extremely suitable for Indian climate and Vertical Systems.

The Finishing Touch

BIO WALL SYSTEM

- ❖ We use Bio wall system, a modular system which is rigid, light weight, three dimensional panel made from Virgin material plastic which supports the plants with both a face grid and a panel depth.
- ❖ This system is designed to hold a green façade off the wall surface so that the plant materials do not attach to the building for support.
- ❖ It provides a captive growing environment for the plants and helps to maintain the integrity of the building membrane.
- ❖ We have an extremely customised growing media consisting of 12 different elements which contribute to the excellent growth of the plants.

BIO WALL SYSTEM INCLUDES

- ❖ Fully developed ornamental plants.
- ❖ Fabricated structure M.S/G.I and fittings.
- ❖ Charcoal black modular HDPE frame structure.
- ❖ Drip irrigation system.
- ❖ Drain system.

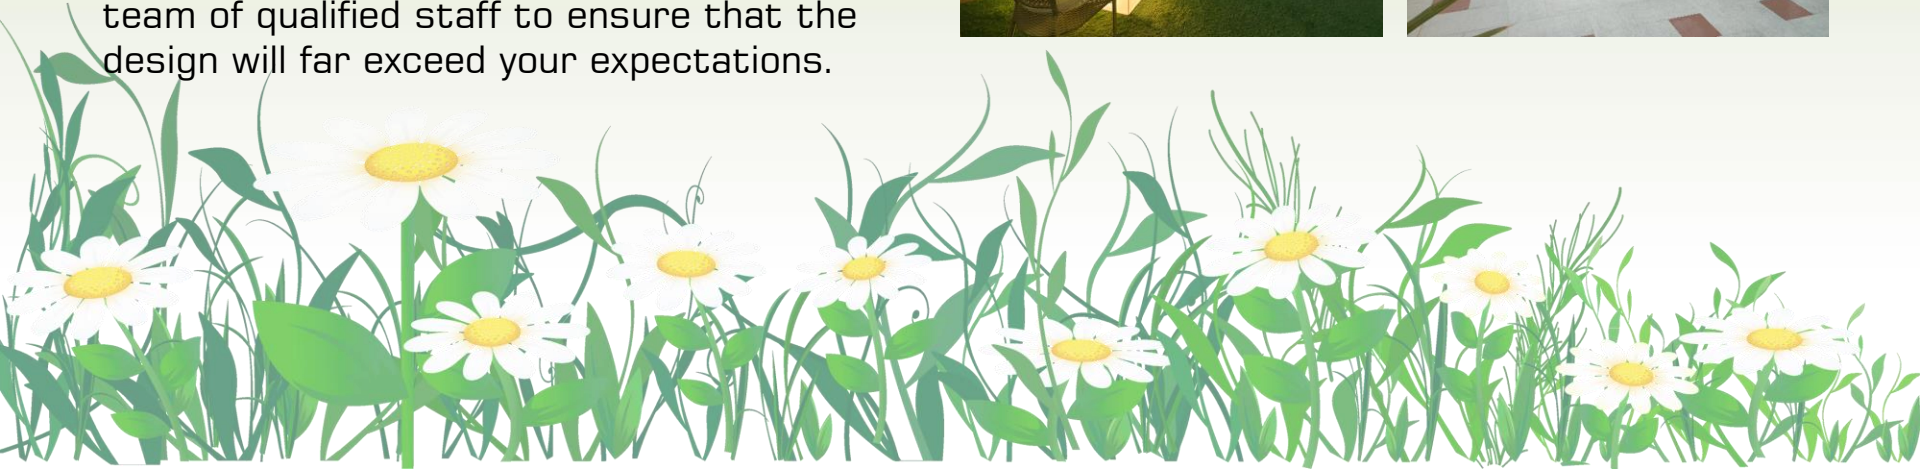

The Finishing Touch

STRUCTURAL LANDSCAPING

Structural landscaping is an aspect of landscaping that often goes unnoticed. When visualizing a landscape project whether it is a deck, pergola, gazebo, privacy screen, or entertainment area, all of these features fall under the structural landscaping umbrella.

We can work with you in the planning process to create the outdoor living area you envisioned and your structural landscaping design can be 3D rendered to give you a realistic insight into the finished product. We will work with a team of qualified staff to ensure that the design will far exceed your expectations.
